

Kilbarchan's CSO

The CSO (Combined Sewage Overflow) is a system which allows raw sewage to be discharged into Kilbarchan Burn under certain circumstances. This tends to be during periods of heavy rainfall. Over a long period of time Kilbarchan Community Council has been pressing for a sewage system for Kilbarchan which does not involve discharging raw sewage into the burn. Our complaint has got as far as the European Commission. We are now seeking further evidence to support our complaint and we are looking for volunteers who would be willing to monitor the condition of the burn. This is a recent example of the problem in the centre of the village: (Outside of the Co-op)

If you are able to help please contact the Community Council by e-mail kilbarchancommunitycouncil@yahoo.co.uk

or leave your contact details at the Old Library Centre.
